THIRD INTERNATIONAL SYMPOSIUM  
ON C–H ACTIVATION

May 30 – June 2, 2016

MESSAGE FROM THE ISCHA3 CO-CHAIRS

On behalf of the organizing committee, we are very pleased to welcome you to Montréal, Québec, Canada for the third edition of the International Symposium on C–H Activation (ISCHA3). Following the successes of the two previous international symposia, held in Beijing, China (2012) and Rennes, France (2014), we will showcase this year the increasing breadth of scientific disciplines that benefit from technologies to activate C–H bonds. The symposium will feature invited lectures from world-class leaders in the fields of:

- ✓ Total Synthesis and Late Stage Functionalization;
- ✓ Materials Science and Energy Conversion;
- ✓ Emerging Technologies;
- ✓ Mechanistic Considerations of C–H Functionalization;
- ✓ Catalytic Methods for C–H Functionalization;
- ✓ Biomimetic C–H Functionalization.

ISCHA3 will bring together a dynamic group of scientists from around the world, drawing from both academia and industry. It will feature **41** oral presentations divided into **21** invited lectures and **20** short oral lectures. As well, **70** poster presentations will contribute to the program, delivered over **2** poster sessions. This symposium would not have been possible without the support of our generous sponsors, who will be showcased during the poster sessions, so please stop by to visit their booths.

Do not hesitate to contact us (or any of our dedicated co-organizers and volunteers) if you need assistance during your stay in Montréal. We hope that you will find some time to enjoy the vibrant and exciting city of Montréal.
